➤ My Profil

Hello!
Resilient and organize, I strive to develop games that make the team proud of, and players satisfied.
Very curious, I always am seeking new technical challenges and learning from each other.

➤ Experiences

Associate Client Developer, 2024
Ankama, Dofus Unity, Lille

In the client team, I developed features and fixed bugs in the release of the Dofus Unity's beta.
- Use pipeline of a live game.
- Work on UIs and combat system.
- Communicate in a 70-person project.

Game Programmer & Designer, 2022
Boby, a Cegid Company, Bordeaux

In this start-up creating an PGI, I developed in 2 months a web-game integrated to the software.
- Teamwork in Scrum and Agile.
- Develop a game for various devices.
- Design a modular codebase.

➤ Student Projects

RSM, 2024-2025 – UE & C++
Jeu Social-Horror, 8 people, 10 months

With 3 other players, cooperate, betray and survive to regain your freedom!
- Organize and coordinate a team.
- Work on the game's concept/intentions.
- Program networked features.

It's not Rocket Science !, 2024 – UE
2v2 Party Game, 5 people, 4 months

In this physics game, cooperate, sabotage to make the highest rocket and take off!
- Work on shipping to Steam.
- Create entirely elastic rope simulation.
- Program a spatial race.
